Bashayer Bamarhul

Frontend Developer (React)

bashayerbamarhul@gmail.com +966 530053659 Portfolio link

PROFESSIONAL SUMMARY

Computer Science Graduate (First Class Honors, GPA 5.0/5.0) and Frontend Developer specializing in React and React JS. Experienced in building performant, responsive web interfaces, designing application architectures, and managing client-side state using Redux and Flux. Proficient in TypeScript, Object-Oriented Programming (OOP), and Functional programming patterns. Hands-on experience integrating REST APIs (SOA concepts), developing backends with Node.js, and utilizing Git, GitHub, and GitLab for version control and code reviews. Skilled in setting up development environments using Linux-based OS, Bash, Docker containers, and CI/CD pipelines.

TECHNICAL SKILLS

Frontend Development
React JS, React, TypeScript, JavaScript (ES6/ES7/ES8), Next.js, HTML5, CSS3 (Optimization, Page Rendering, Methodologies), Tailwind CSS, Material UI

Backend & API Architecture
Node.js, NestJS, PHP (Laravel), REST APIs, SOA Concepts

State Management & Patterns
Redux, Flux, React Hooks (useState, useContext), OOP & Functional Programming Design Patterns

DevOps, Tools & Workflows
Git, GitHub, GitLab, Bash, Linux-based OS, Docker, CI/CD (Principles & Instruments), Figma, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Development Intern 05/2025 – 07/2025
Nexcore Jeddah, Saudi Arabia

- Developed 30+ reusable, functional, and type-safe frontend components using React JS and TypeScript aligned with UI/UX specs and business requirements.
- Collaborated in Agile sprint environments with cross-functional teams, leveraging Git, GitHub, and GitLab for source code management, code reviews, and quality control.
- Implemented state management using React Hooks (useState, useContext) alongside Redux / Flux patterns for scalable data flow across applications.
- Executed cross-browser and cross-device testing, optimizing CSS rendering and page performance, and maintaining clear technical documentation.

PROJECTS

- **Mubram Platform (منصة العقود الإلكترونية - Mubram):** Engineered an interactive, component-based frontend for a digital contract management and documentation platform. Integrated React, TypeScript, and Tailwind CSS to build complex contract workflows, secure forms, and optimized UI components.
- **Nexcore Company Website :** Built reusable UI components and interactive web sections ensuring cross-platform consistency and high performance. Managed codebase workflows using GitLab and GitHub.
- **Solen Website :** Developed an accessible (WCAG 2.1 compliant), fully responsive frontend across multiple device screen sizes using modern CSS optimization techniques.

EDUCATION

Bachelor of Computer Science 01/2022 – 06/2026
KING ABDULAZIZ UNIVERSITY Jeddah, Kingdom of Saudi Arabia

- **GPA:** 5.0/5.0 (First Class Honors / First Rank)
- **Relevant Coursework:** Introduction to Software Engineering, Data Structures & Algorithms, OOP, SQL & Relational Databases

DEVELOPMENT ENVIRONMENT & TOOLS

- **Environment Setup:** Experienced in setting up and maintaining development environments on Linux-based OS using Bash scripts, containerizing applications with Docker, and integrating with CI/CD pipelines.

LANGUAGES

- Arabic
- English
